

# Bhupani Mounika

📍 India    ✉ bhupanimounika123@gmail.com    in LinkedIn.com/bhupanimounika    🌐 github.com/mounika

## Education

---

**Vellore Institute of Technology AP**  
Integrated M.Tech CSE

Aug 2021 – May 2026  
CGPA - 8.54

**Sri Chaitanya College**  
M.P.C

June 2019– July 2021  
Percentage - 96.3%

## Projects

---

### Automated Bus Scheduling

[github.com](#) 

- Launched automated bus scheduling system utilizing Node.js, Express.js, MongoDB, CSS, and Bootstrap, adhering to MVC architecture, which improved on-time arrival rate by 15% across all routes
- Integrated an edit feature for manual adjustments, enhancing scheduling flexibility and control, resulting in a 50% reduction in scheduling conflicts.

### Wealth Management Solution

[github.com](#) 

- Built a financial tracking system using ReactJS, Node.js, Firebase, Chart.js, and Bootstrap for expense logging, savings goals, reports, and data visualization.
- Enabled secure, one-click authentication via Google Sign-Up, decreasing user login time by 60% and boosting successful logins by 35%, leading to a more streamlined onboarding experience.

### Malware classification using deep learning models

[github.com](#) 

- Designed a malware classification system using Python, TensorFlow, and PyTorch, leveraging ResNet50 (99% accuracy), CNN (94.60% accuracy), and MobileNetV2 (Train Accuracy: 96.58%) for improved detection.
- Achieved 99% accuracy with ResNet50, significantly enhancing overall classification performance and reliability on the Maling dataset.

### Identification Medicinal Plants Using Image processing

[github.com](#) 

- Created an image recognition system with ReactJS, Flask, Bootstrap, and deep learning models to identify medicinal plants, displaying names, uses, and descriptions.
- Trained a CNN model, achieving 95% accuracy in medicinal plant identification, improving the efficiency of plant classification.

### Job Portal Application

[github.com](#) 

- Established a job portal using Node.js, Express.js, CSS, and MongoDB, reducing manual job searching time by 50% and streamlining employer-job seeker connections.
- Enabled companies to post job listings and manage applications efficiently, optimizing the hiring process and improving user experience.

## Technologies

---

**Programming Languages:** C++, Java, Python

**Databases:** SQL/NoSQL databases (MySQL, MongoDB)

**DevOps & Tools:** Git, GitHub, CI/CD (Jenkins), Linux

**Frameworks:** MERN stack (MongoDB, Express.js, React, Node.js)

## Hackathons

---

- Secured 4th position in 24-Hour Great India Hackfest 2024 hosted by CSI Chapter VIT-AP on 9th March 2024
- Secured a 2nd position in the National-Level Hackathon held at NRI Institute of Technology on 13 December 2024
